Small Business Risk Reduction to Natural Hazards & Extreme Weather in Rhode Island

A Guide for MANUFACTURING

For more information
http://climatechange.ri.gov
Historic Structures
For historic properties, consult the following resources:

- “Keeping History Above Water” - created by the Rhode Island-based Newport Restoration Foundation to help protect historic resources from climate hazards. [www.historyabovewater.org](http://www.historyabovewater.org)
- FEMA “How-To” Guide #6 (FEMA 386-6) - provides comprehensive guidance to historic property owners. [www.fema.gov/media-library/assets/documents/4317](http://www.fema.gov/media-library/assets/documents/4317)
- Check with your local building official about your specific location. Also, coordinate with the State Historic Preservation Officer and the local Historic District Commission.

Americans with Disabilities Act Compliance
Before implementing a risk reduction project consider how it will affect access for people with physical disabilities. Structural changes may require that additional efforts be taken to maintain ADA compliance. Talk to your local building official about your plans before proceeding.

Elevating Buildings and Pedestrian Access
Elevating a building or installing floodwalls may lead to a loss of visibility or access, affecting your ability to attract customers. Identify protection options that avoid this outcome, and contact your local building official to clarify state and local requirements. Note that some business operations can occur in the lower section of an elevated building on a temporary basis.

What if I Rent?
Businesses that do not own their space can still perform many risk reduction actions, including buying flood insurance, planning and preparing, and performing some minor site alterations. At your next lease renewal, add a provision that rent does not need to be paid if the site is inaccessible or unusable during a hazard event. Discuss property protection with your landlord - they don’t want their building empty and their tenants damaged, either!

What Should My Employees Know?
Consider having all employees become certified by ServSafe. Visit [www.rifoodsafety.org](http://www.rifoodsafety.org) for more information on the certification program. Employees should also be aware of the proper protocols with any crisis management plans, food safety plans, and other emergency plans that are set in place. It is important that employees understand and are aware of the different requirements, such as storage temperatures and shelf life, of perishables to prevent spoiled food from being served.

IMPORTANT DEFINITIONS

Natural Hazards = Extreme weather events that can cause damage. Examples include hurricanes, floods, blizzards, or severe wind.

Business Features = The many parts that make a business run. By looking at how a hazard affects each feature, you can take focused steps to reduce risk.

Vulnerability = Business features that make your business more likely to be impacted by a natural hazard.

Risk = The level of exposure that a business has to a certain hazard. Higher vulnerability and a frequent natural hazard create higher risk.

Resilience = The ability of a business to “bounce back” after a severe event. It is how much individuals, institutions, and businesses can survive, adapt, and grow no matter the weather events they experience.
## USEFUL RESOURCES

### Federal Government

**U.S. Small Business Association**  
[www.sba.gov/funding-programs/disaster-assistance](www.sba.gov/funding-programs/disaster-assistance)  
R.I. District Office (401) 528-4561  
Provides low-interest loans to help businesses recover from declared disasters.

**FEMA**  
[www.fema.gov/small-businesses](www.fema.gov/small-businesses) or [www.ready.gov/business](www.ready.gov/business)  
Provides resources & information to help businesses prepare for disasters.  
Subsidizes insurance, available to businesses through most insurance agencies.

### State Government

**Rhode Island Commerce Corporation**  
[www.rismallbiz.com](www.rismallbiz.com)  
(401) 278-9100  
Hosts a Small Business Hotline, where business owners can ask questions and get support for a wide array of issues.

**Rhode Island Department of Emergency Management Agency (RIEMA)**  
[www.riema.ri.gov/resources/business/](www.riema.ri.gov/resources/business/)  
Daytime: (401) 222-1360  
Emergency & After Hours: (401) 222-3070  
Organizes emergency response efforts at a state level. RIEMA has programs in preparedness, mitigation, response and recovery.

### HOW TO USE THIS GUIDE

1. **Consider Key Business Features**  
   Page 3

2. **Identify Vulnerabilities and Strengths**  
   Page 4

3. **Select Risk Reduction Strategies**  
   Pages 5 - 6

4. **Consider Insurance Options**  
   Pages 7 - 8

5. **Useful Resources**  
   Page 9
FEMA offers subsidized flood insurance through the National Flood Insurance Program (NFIP). You do not need to be in a flood zone, nor do you need to own your building, to purchase flood insurance.

- One inch of water in a building can cause more than $25,000 in damage.
- Standard insurance typically does not cover flood damage.
- More than 1 in 5 flood claims come from outside high-risk flood zones (and that does not include building owners who were not insured, and therefore could not file claims).
- Flood insurance can pay whether or not there is a Disaster Declaration.
- Disaster assistance must be paid back with interest. The average flood insurance claim is nearly $30,000 and is not required to be repaid.

Can’t I just get Disaster Assistance after a flood?
Disaster Assistance is given as a loan, it is not guaranteed, and it needs to be paid back with interest. It is not meant to make you whole again. Don’t only rely on emergency assistance, get flood insurance!

Your insurance agent can provide detailed answers to these questions specific to your business.

How do I get flood insurance?
Flood insurance policies are backed by the National Flood Insurance Program (NFIP). You can get a policy through most insurance agents.

Does flood insurance cover the building or its contents?
Contents and building coverage are separate; contents are not covered unless specifically included. Building coverage includes the structure and foundation, building utilities, and walk-in freezers. Contents coverage includes furniture, fixtures, equipment, and stock.

If my landlord has flood insurance, do I need it too?
The landlord may not provide any coverage or may have only building coverage. A renter can purchase its own flood insurance policy.

What is not covered by flood insurance?
Flood insurance policies do not cover everything or all water-related situations and damages. For example, outdoor assets such as landscaping, decks, or vehicles are not covered. Either is business interruption. Additionally, damage from burst pipes, backed-up municipal sewage, or poor site management is not covered.

How can I lower my premium?
Flood insurance cost is related to the level of flood risk. Risk reduction actions can lower premiums. Your community can also take steps to lower premiums.

My business is not in a flood zone. Do I need flood insurance?
A large percentage of flood damage happens outside of FEMA-designated floodplains. If your business is outside of a FEMA flood zone, flood insurance is generally inexpensive. Assess your risk and talk to your agent to make an informed decision.

</table>

A business is never completely safe from hazards. Insurance helps to protect the time and money you invest in your business against the worst-case scenarios.

**What is covered by my business insurance policies?**
A standard insurance policy may not cover important situations, like damages caused by floods or losses from business interruption. Talk with your agent about different situations that concern you to see if you’re protected.

**I rent my workspace. What is covered by my landlord’s insurance?**
A landlord’s insurance policy may or may not cover losses incurred by tenants. Ask for a copy of the insurance policy and bring it to your own agent to review.

**Does my standard policy cover business interruption?**
You may lose business after a storm if power goes out, if roads are blocked, or if you need to close for repairs. Check with your agent whether lost business is covered or if you should purchase a rider to increase coverage.

**What about liability and automobile insurance?**
Liability and auto insurance are separate from business insurance and flood insurance. Talk to your agent about other policies you may need and what they cover. For example, auto insurance may partially cover your vehicle(s) for hazard events like severe storms.

**What is a hurricane deductible?**
Some policies include a separate hurricane deductible. Because hurricanes are rare, you pay less monthly. However, if a hurricane does hit, you will pay more before insurance kicks in. A storm must be hurricane-force when it hits Rhode Island for hurricane deductibles to apply. You may have other weather related deductibles (for example wind or hail). Check with your insurance agent to discuss what deductibles you may have and how they apply to other weather related events.

**How do I make filing a claim easier?**
Have insurance information and current inventory and equipment lists on-hand. Take photos or videos of your business site and inventory now, BEFORE an event occurs. Then, take photographs/video of any damage before clean-up or repairs. DO NOT make permanent repairs until your insurance company inspects the property. Save all receipts, including those from any temporary repairs.

Your insurance agent can provide detailed answers to these questions specific to your business.
SELECT RISK REDUCTION STRATEGIES

1. Building
   - Store Protection Materials
     - Store items on-site such as sand bags to reduce flooding, pre-sized plywood to protect windows, or salt for snow and ice.
   - High-Cost Risk Reduction Actions
     - Elevate interior floor, floodproof, or elevate entire building above flood level. Upgrade roof to a higher code for wind-load capacity.
   - Moderate-Cost Risk Reduction Actions
     - Sump pump in basement, backflow-prevention on plumbing, seal exterior walls, install flood gates that close during floods, “hurricane glass”.

2. Access
   - Partial Operations
     - Identify operations that can be performed (such as product design or online sales) even if access to your site and equipment is not possible.
   - Diversify Services
     - Expand the types of services offered to include services that do not require access to your site and equipment.

3. Documents & Records
   - Protect Documents and Records
     - Store files in protective containers in elevated spaces. Back up records electronically, and store off-site or on the cloud.

4. Employees & Vendors
   - Third-Party Vendor Resilience
     - Identify backup vendors in case a hazard prevents third-party services from operating.

5. Inventory & Storage
   - Protect Inventory
     - Store inventory in protective containers. Raise items on platforms or upper floors, tie down outdoor inventory, protect hazardous materials.

6. Utilities & Equipment
   - Seal Interior Rooms
     - Construct or install flood barriers to protect key utilities and equipment. Floodproof equipment if possible.
   - Backup Power
     - Acquire/install a backup generator capable of running manufacturing equipment and train staff to operate. Store fuel on-site.
   - Protect Utilities and Equipment
     - Raise utilities and essential equipment above flood levels on platforms or upper floors. Waterproof or protect with immovable barriers.

7. Insurance
   - Ask About Insurance Coverage
     - Check with your agent about the specifics of your coverage. See the next page for questions to ask.

Staff Time Required
- No staff time needed
- Overtime needed
- Within normal operations
- Additional staff or help

Relative Cost
- $ Within normal budget
- $Additional capital needed
- $Grants may be needed

Space Required
- Minimal space needed
- Find space on site
- Buy or rent more space

(Continued) Employees & Vendors
- “Business Continuity Plan”
  - Develop a business continuity or emergency plan. Identify needs, educate staff, assign responsibilities and perform drills.
- Emergency Supplies for Employees
  - Develop abilities to collaborate & schedule without office access to allow for continued operations.

(Continued) Inventory & Storage
- Partner with Other Businesses
  - Partner with another business to temporarily store items at one-another’s sites or to use equipment if either site is compromised.

(Continued) Utilities & Equipment
- Protect Documents and Records
  - Store files in protective containers in elevated spaces. Back up records electronically, and store off-site or on the cloud.

(Continued) Insurance
- Ask About Insurance Coverage
  - Check with your agent about the specifics of your coverage. See the next page for questions to ask.

FLOOD INSURANCE

FEMA offers subsidized flood insurance through the National Flood Insurance Program (NFIP). **You do not need to be in a flood zone, nor do you need to own your building, to purchase flood insurance.**

- One inch of water in a building can cause more than $25,000 in damage.
- Standard insurance typically does not cover flood damage.
- More than 1 in 5 flood claims come from outside high-risk flood zones (and that does not include building owners who were not insured, and therefore could not file claims).
- Flood insurance can pay whether or not there is a Disaster Declaration.
- Disaster assistance must be paid back with interest. The average flood insurance claim is nearly $30,000 and is not required to be repaid.

**Can’t I just get Disaster Assistance after a flood?**
Disaster Assistance is given as a loan, it is not guaranteed, and it needs to be paid back with interest. It is not meant to make you whole again. Don’t only rely on emergency assistance, get flood insurance!

Your insurance agent can provide detailed answers to these questions specific to your business.

**How do I get flood insurance?**
Flood insurance policies are backed by the National Flood Insurance Program (NFIP). You can get a policy through most insurance agents.

**Does flood insurance cover the building or its contents?**
Contents and building coverage are separate; contents are not covered unless specifically included. Building coverage includes the structure and foundation, building utilities, and walk-in freezers. Contents coverage includes furniture, fixtures, equipment, and stock.

**If my landlord has flood insurance, do I need it too?**
The landlord may not provide any coverage or may have only building coverage. A renter can purchase its own flood insurance policy.

**What is not covered by flood insurance?**
Flood insurance policies do not cover everything or all water-related situations and damages. For example, outdoor assets such as landscaping, decks, or vehicles are not covered. Either is business interruption. Additionally, damage from burst pipes, backed-up municipal sewage, or poor site management is not covered.

**How can I lower my premium?**
Flood insurance cost is related to the level of flood risk. Risk reduction actions can lower premiums. Your community can also take steps to lower premiums.

**My business is not in a flood zone. Do I need flood insurance?**
A large percentage of flood damage happens outside of FEMA-designated floodplains. If your business is outside of a FEMA flood zone, flood insurance is generally inexpensive. Assess your risk and talk to your agent to make an informed decision.

IMPORTANT DEFINITIONS

**Natural Hazards** = Extreme weather events that can cause damage. Examples include hurricanes, floods, blizzards, or severe wind.

**Business Features** = The many parts that make a business run. By looking at how a hazard affects each feature, you can take focused steps to reduce risk.

**Vulnerability** = Business features that make your business more likely to be impacted by a natural hazard.

**Risk** = The level of exposure that a business has to a certain hazard. Higher vulnerability and a frequent natural hazard create higher risk.

**Resilience** = The ability of a business to “bounce back” after a severe event. It is how much individuals, institutions, and businesses can survive, adapt, and grow no matter the weather events they experience.

HISTORIC STRUCTURES

For historic properties, consult the following resources:

- “Keeping History Above Water” - created by the Rhode Island-based Newport Restoration Foundation to help protect historic resources from climate hazards. [www.historyabovewater.org](http://www.historyabovewater.org)
- FEMA “How-To” Guide #6 (FEMA 386-6) - provides comprehensive guidance to historic property owners. [www.fema.gov/media-library/assets/documents/4317](http://www.fema.gov/media-library/assets/documents/4317)
- Check with your local building official about your specific location. Also, coordinate with the State Historic Preservation Officer and the local Historic District Commission.

AMERICANS WITH DISABILITIES ACT COMPLIANCE

Before implementing a risk reduction project consider how it will affect access for people with physical disabilities. Structural changes may require that additional efforts be taken to maintain ADA compliance. Talk to your local building official about your plans before proceeding.

ELEVATING BUILDINGS AND PEDESTRIAN ACCESS

Elevating a building or installing floodwalls may lead to a loss of visibility or access, affecting your ability to attract customers. Identify protection options that avoid this outcome, and contact your local building official to clarify state and local requirements. Note that some business operations can occur in the lower section of an elevated building on a temporary basis.

WHAT IF I RENT?

Businesses that do not own their space can still perform many risk reduction actions, including buying flood insurance, planning and preparing, and performing some minor site alterations. At your next lease renewal, add a provision that rent does not need to be paid if the site is inaccessible or unusable during a hazard event. Discuss property protection with your landlord - they don’t want their building empty and their tenants damaged, either!

WHAT SHOULD MY EMPLOYEES KNOW?

Consider having all employees become certified by ServSafe. Visit [www.rifoodsafety.org](http://www.rifoodsafety.org) for more information on the certification program. Employees should also be aware of the proper protocols with any crisis management plans, food safety plans, and other emergency plans that are set in place. It is important that employees understand and are aware of the different requirements, such as storage temperatures and shelf life, of perishables to prevent spoiled food from being served.
