Small Business Risk Reduction to Natural Hazards & Extreme Weather in Rhode Island

A Guide for WATER DEPENDENT BUSINESSES

For more information
http://climatechange.ri.gov
Historic Structures

For historic properties, consult the following resources:

• “Keeping History Above Water” - created by the Rhode Island-based Newport Restoration Foundation to help protect historic resources from climate hazards. www.historyabovewater.org
• FEMA “How-To” Guide #6 (FEMA 386-6) - provides comprehensive guidance to historic property owners. www.fema.gov/media-library/assets/documents/4317
• Check with your local building official about your specific location. Also, coordinate with the State Historic Preservation Officer and the local Historic District Commission.

Americans with Disabilities Act Compliance

Before implementing a risk reduction project consider how it will affect access for people with physical disabilities. Structural changes may require that additional efforts be taken to maintain ADA compliance. Talk to your local building official about your plans before proceeding.

Elevating Buildings and Pedestrian Access

Elevating a building or installing floodwalls may lead to a loss of visibility or access, affecting your ability to attract customers. Identify protection options that avoid this outcome, and contact your local building official to clarify state and local requirements. Note that some business operations can occur in the lower section of an elevated building on a temporary basis.

What if I Rent?

Businesses that do not own their space can still perform many risk reduction actions, including buying flood insurance, planning and preparing, and performing some minor site alterations. At your next lease renewal, add a provision that rent does not need to be paid if the site is inaccessible or unusable during a hazard event. Discuss property protection with your landlord - they don’t want their building empty and their tenants damaged, either!

What Should My Employees Know?

Consider having all employees become certified by ServSafe. Visit www.rifoodsafety.org for more information on the certification program. Employees should also be aware of the proper protocols with any crisis management plans, food safety plans, and other emergency plans that are set in place. It is important that employees understand and are aware of the different requirements, such as storage temperatures and shelf life, of perishables to prevent spoiled food from being served.
# USEFUL RESOURCES

## Federal Government

**U.S. Small Business Association**  
[www.sba.gov/funding-programs/disaster-assistance](http://www.sba.gov/funding-programs/disaster-assistance)  
R.I. District Office (401) 528-4561  
Provides low-interest loans to help businesses recover from declared disasters.

**FEMA**  
[www.fema.gov/small-businesses](http://www.fema.gov/small-businesses)  
Or [www.ready.gov/business](http://www.ready.gov/business)  
Provides resources & information to help businesses prepare for disasters.  
Subsidizes insurance, available to businesses through most insurance agencies.

## State Government

**Rhode Island Commerce Corporation**  
[www.rismallbiz.com](http://www.rismallbiz.com)  
(401) 278-9100  
Hosts a Small Business Hotline, where business owners can ask questions and get support for a wide array of issues

**Rhode Island Department of Emergency Management Agency (RIEMA)**  
[www.riema.ri.gov/resources/business/](http://www.riema.ri.gov/resources/business/)  
Daytime: (401) 222-1360  
Emergency & After Hours: (401) 222-3070  
Organizes emergency response efforts at a state level. RIEMA has programs in preparedness, mitigation, response and recovery.

**Rhode Island Department of Health Food Safety**  
[www.health.ri.gov/food/](http://www.health.ri.gov/food/)  
Phone: (401) 222-2749  
After-hours: (401) 279-8046

**Rhode Island Food Dealers Association**  
[www.rifda.com](http://www.rifda.com)  
(401) 431-0880

**Department of Business Regulation**  
[www.dbr.ri.gov/divisions/insurance/](http://www.dbr.ri.gov/divisions/insurance/)  
Online source for answers to insurance questions and for insurance related inquiries.

**STORMTOOLS**  
[www.beachsamp.org/stormtools/](http://www.beachsamp.org/stormtools/)  
An interactive tool to display storm inundation with and without sea level rise scenarios.

**RI Coastal Resources Management Council - Coastal Hazard Application**  
[www.crmc.ri.gov/coastalhazardapp.html](http://www.crmc.ri.gov/coastalhazardapp.html)  
Online viewer and worksheet to identify a location’s level of coastal hazard.

## Local Government

Your local institutions, organizations, and utilities are often the best places to turn.  

Identify key staff and contact information:

<table>
<thead>
<tr>

# HOW TO USE THIS GUIDE

1. **Consider Key Business Features**  
   Page 3
2. **Identify Vulnerabilities and Strengths**  
   Page 4
3. **Select Risk Reduction Strategies**  
   Pages 5 - 6
4. **Consider Insurance Options**  
   Pages 7 - 8
5. **Useful Resources**  
   Page 9
FLOOD INSURANCE

FEMA offers subsidized flood insurance through the National Flood Insurance Program (NFIP). **You do not need to be in a flood zone, nor do you need to own your building, to purchase flood insurance.**

- One inch of water in a building can cause more than $25,000 in damage.
- Standard insurance typically does not cover flood damage.
- More than 1 in 5 flood claims come from outside high-risk flood zones (and that does not include building owners who were not insured, and therefore could not file claims).
- Flood insurance can pay whether or not there is a Disaster Declaration.
- Disaster assistance must be paid back with interest. The average flood insurance claim is nearly $30,000 and is not required to be repaid.

**Can’t I just get Disaster Assistance after a flood?**
Disaster Assistance is given as a loan, it is not guaranteed, and it needs to be paid back with interest. It is not meant to make you whole again. Don’t only rely on emergency assistance, get flood insurance!

**Your insurance agent can provide detailed answers to these questions specific to your business.**

**How do I get flood insurance?**
Flood insurance policies are backed by the National Flood Insurance Program (NFIP). You can get a policy through most insurance agents.

**Does flood insurance cover the building or its contents?**
Contents and building coverage are separate; contents are not covered unless specifically included. Building coverage includes the structure and foundation, building utilities, and walk-in freezers. Contents coverage includes furniture, fixtures, equipment, and stock.

**If my landlord has flood insurance, do I need it too?**
The landlord may not provide any coverage or may have only building coverage. A renter can purchase its own flood insurance policy.

**What is not covered by flood insurance?**
Flood insurance policies do not cover everything or all water-related situations and damages. For example, outdoor assets such as landscaping, decks, or vehicles are not covered. Either is business interruption. Additionally, damage from burst pipes, backed-up municipal sewage, or poor site management is not covered.

**How can I lower my premium?**
Flood insurance cost is related to the level of flood risk. Risk reduction actions can lower premiums. Your community can also take steps to lower premiums.

**My business is not in a flood zone. Do I need flood insurance?**
A large percentage of flood damage happens outside of FEMA-designated floodplains. If your business is outside of a FEMA flood zone, flood insurance is generally inexpensive. Assess your risk and talk to your agent to make an informed decision.
### Vulnerabilities

---

**A business is never completely safe from hazards.** Insurance helps to protect the time and money you invest in your business against the worst-case scenarios.

Water dependent businesses often have 4 types of insurance: flood, dry property, wet property & liability. These types of insurance can have very different terms, such as deductibles and types of risks covered. Often, it is possible to purchase an Actual Cash Value (ACV) policy, but it does not cover replacement costs.

Your insurance agent can provide detailed answers to these questions specific to your business.

**What is covered by my business insurance policies?**
A standard insurance policy may not cover important situations, like damages caused by floods or losses from business interruption. Talk with your agent about different situations that concern you to see if you’re protected.

**I rent my workspace. What is covered by my landlord’s insurance?**
A landlord’s insurance policy may or may not cover losses incurred by tenants. Ask for a copy of the insurance policy and bring it to your own agent to review.

**Does my standard policy cover business interruption?**
You may lose business after a storm if power goes out, if roads are blocked, or if you need to close for repairs. Check with your agent whether lost business is covered or if you should purchase a rider to increase coverage.

**What about liability and automobile insurance?**
Liability and auto insurance are separate from business insurance and flood insurance. Talk to your agent about other policies you may need and what they cover. For example, auto insurance may partially cover hazard events like severe storms.

**What is a hurricane deductible?**
Some policies include a separate hurricane deductible. Because hurricanes are rare, you pay less monthly. However, if a hurricane does hit, you will pay more before insurance kicks in. A storm must be hurricane-force when it hits Rhode Island for hurricane deductibles to apply. You may have other weather related deductibles (for example wind or hail). Check with your insurance agent to discuss what deductibles you may have and how they apply to other weather related events.

**How do I make filing a claim easier?**
Have insurance information and current inventory and equipment lists on-hand. Take photos or videos of your business site and inventory now, BEFORE an event occurs. Then, take photographs/video of any damage before clean-up or repairs. DO NOT make permanent repairs until your insurance company inspects the property. Save all receipts, including those from any temporary repairs.

---

**CHOOSING INSURANCE**

A business is never completely safe from hazards. Insurance helps to protect the time and money you invest in your business against the worst-case scenarios.

---

**IDENTIFY VULNERABILITIES AND STRENGTHS**

1. **BUILDING STRUCTURE**
   - How important is the building to operations? How vulnerable is it to damage?
   - Basement
   - Elevated
   - Large or old windows, old roof
   - Hurricane-proof windows, shutters, roof

2. **BUSINESS SITE**
   - What site features are vulnerable to damage?
   - Piers, docks, or gangways
   - Structural protection in place on site
   - Sources of risk (like trees) near building
   - Drainage or green infrastructure features

3. **DOCUMENTS AND RECORDS**
   - How are documents stored? Is information management a specific service?
   - Hard-copies
   - Electronic copies
   - Located on-site
   - Stored on “the cloud” and/or offsite

4. **EMPLOYEES AND VENDORS**
   - Can employees work remotely? Do you rely on third party vendors?
   - Staff do not live locally
   - Staff are trained in hazard response
   - Staff may be exposed to natural hazards
   - Redundancy in supply chain
   - Rely on third-parties
   - Staff/vendor communication protocol

5. **CUSTOMERS**
   - Do customers access the site? Is customer experience essential to services?
   - Dependent on customer access
   - Strong customer base & relationships
   - Dependent on customer experience
   - Strong customer outreach system

6. **INVENTORY & STORAGE**
   - Where are the items stored? Are any perishable?
   - Storage in basement or outdoors
   - Storage on upper level
   - Refrigerated items on site
   - Storage elevated
   - Fuel stored on site
   - Minimal storage

7. **BUILDING UTILITIES & SPECIALIZED EQUIPMENT**
   - Can you operate without utilities? Where are utilities and equipment located?
   - Located in basement
   - On upper level, floodproofed or elevated
   - Located outdoors
   - Backup power (batteries, generators) & fuel
   - Site experiences frequent utility outages
   - Served by municipal water & sewer

8. **INSURANCE**
   - Do you have Insurance? Does it cover contents, interruption, or natural disasters?
   - Standard insurance policy
   - Specialized disaster insurance
   - Not sure about insurance policy
   - Business interruption & contents
## Select Risk Reduction Strategies

### Building

**Replaceable Materials**
- Use easily-replaced materials (such as removable vinyl curtains, rather than permanent glass, for porch enclosure).
- 

**Moderate-Cost Risk Reduction Actions**
- Sump pump in basement, backflow-prevention on plumbing, seal exterior walls, install flood gates that close during floods, “hurricane glass”.
- 

**Flood-Resistant Building Materials**
- Use building materials like concrete and tile that can withstand flooding, allowing for more rapid recovery following an event.
- 

**High-Cost Risk Reduction Activities**
- Elevate interior floor, floodproof or elevate entire building above flood level. Upgrade roof to a higher code for wind-load capacity.
- 

### Site

**Green Infrastructure**
- Use green landscape designs (including rain gardens and permeable pavers) to minimize runoff, protect your site, and lower maintenance.
- 

**Grade Site**
- Grade your site and upgrade drainage to direct water away from the building, and to accelerate removal of water form site after a storm.
- 

**Install Flood Walls**
- Construct flood walls to protect an entire site from flooding. Flood walls may not be permitted in riverine flood zones.
- 

### Employees & Vendors

**Replaceable Materials**
- Use easily-replaced materials (such as removable vinyl curtains, rather than permanent glass, for porch enclosure).
- 

### Customers

**Partial Operations**
- Provide a degree of service through disruptions to maintain customer loyalty & build goodwill in the community. Or look to diversify the business.
- 

### Inventory & Storage

**Protect Inventory**
- Store inventory in protective containers. Raise items on platforms or upper floors, tie down outdoor inventory, protect hazardous materials.
- 

### Utilities & Equipment

**Protect Utilities and Equipment**
- Raise utilities and essential equipment above flood levels on platforms or upper floors. Waterproof or protect with immovable barriers.
- 

### Insurance

**Ask About Your Insurance Coverage**
- Check with your agent about the specifics of your coverage. See the next page for questions to ask.
- 

### Staff Time Required

- No staff time needed
- Overtime needed
- Within normal operations
- Additional staff or help

### Relative Cost

- Within normal budget
- Grants may be needed
- Additional capital needed

### Space Required

- Minimal space needed
- Buy or rent more space
SELECT RISK REDUCTION STRATEGIES

1. Building
   - Replaceable Materials
     Use easily-replaced materials (such as removable vinyl curtains, rather than permanent glass, for porch enclosure).
     - Required Investment: $$
   - Moderate-Cost Risk Reduction Actions
     Sump pump in basement, backflow-prevention on plumbing, seal exterior walls, install flood gates that close during floods, "hurricane glass".
     - Required Investment: $$
   - Flood-Resistant Building Materials
     Use building materials like concrete and tile that can withstand flooding, allowing for more rapid recovery following an event.
     - Required Investment: $$
   - High-Cost Risk Reduction Activities
     Elevate interior floor, floodproof or elevate entire building above flood level. Upgrade roof to a higher code for wind-load capacity.
     - Required Investment: $$$
   - Green Infrastructure
     Use green landscape designs (including rain gardens and permeable pavers) to minimize runoff, protect your site, and lower maintenance.
     - Required Investment: $$
   - Grade Site
     Grade your site and upgrade drainage to direct water away from the building, and to accelerate removal of water form site after a storm.
     - Required Investment: $$
   - Install Flood Walls
     Construct flood walls to protect an entire site from flooding. Flood walls may not be permitted in riverine flood zones.
     - Required Investment: $$$

2. Site
   - Protect Documents and Records
     Store files in protective containers in elevated spaces. Back up records electronically, and store off-site or on the cloud.
   - Employees & Vendors
     Develop a business continuity or emergency plan. Identify needs, educate staff, assign responsibilities and perform drills.
   - Customers
     Include lead person, time triggers, identify employees to execute tasks, and outline communications with customers/boat owners.
   - Inventory & Storage
     Store inventory in protective containers. Raise items on platforms or upper floors, tie down outdoor inventory, protect hazardous materials.
   - Utilities & Equipment
     Raise utilities and essential equipment above flood levels on platforms or upper floors. Waterproof or protect with immovable barriers.
   - Partnership with Other Businesses
     Partner with another business to briefly store inventory at one-another’s sites if either one is compromised.
   - Protect Utilities and Equipment
     Ask About Your Insurance Coverage
     Check with your agent about the specifics of your coverage. See the next page for questions to ask.

3. Documents & Records
4. "Business Continuity Plan"
5. Employees & Vendors
6. "Storm Preparedness Plan"
7. Partial Operations
8. Inventory & Storage
9. "Business Continuity Plan"
10. "Storm Preparedness Plan"
11. "Partial Operations"
12. "Inventory & Storage"
13. "Utilities & Equipment"
14. "Partnership with Other Businesses"
15. "Protect Utilities and Equipment"
16. "Ask About Your Insurance Coverage"

Staff Time Required
- No staff time needed
- Overtime needed
- Within normal operations
- Additional staff or help

Relative Cost
- Within normal budget
- Additional capital needed
- Grants may be needed

Space Required
- Minimal space needed
- Find space on site
- Buy or rent more space
Vulnerabilities

BUILDING STRUCTURE
How important is the building to operations? How vulnerable is it to damage?

- Basement
- Large or old windows, old roof
- Near coast or river, in mapped flood zone
- Sources of risk (like trees) near building

- Elevated
- Hurricane-proof windows, shutters, roof
- Located uphill, out of flood areas
- Structural protection in place on site

ACCESS
Is access essential for customers, employees, others? How often is it blocked?

- Low-lying roads get flooded
- High tree cover over roads

- Multiple routes of access
- Can operate remotely or offsite
- Easily accessible on foot (good sidewalks)

DOCUMENTS AND RECORDS
How are documents stored? Is information management a specific service?

- Hard-copies
- Located on-site
- Electronic copies
- Stored on "the cloud" and/or offsite

EMPLOYEES AND VENDORS
Can employees work remotely? Do you rely on third party vendors?

- Staff do not live locally
- Staff may be exposed to natural hazards
- Rely on third parties

- Staff are trained in hazard response
- Redundancy in supply chain
- Staff/vendor communication protocol

CUSTOMERS
Do customers access the site? Is customer experience essential to services?

- Dependent on customer access
- Dependent on customer experience

- Strong customer base & relationships
- Strong customer outreach system

INVENTORY & STORAGE
Where are the items stored? Are any perishable?

- Storage in basement or outdoors
- Refrigerated items on site
- Fuel stored on site

- Storage on upper level
- Storage elevated
- Minimal storage

BUILDING UTILITIES & SPECIALIZED EQUIPMENT
Can you operate without utilities? Where are utilities and equipment located?

- Located in basement
- Located outdoors
- Site experiences frequent utility outages

- On upper level, floodproofed or elevated
- Backup power (batteries, generators) & fuel
- Served by municipal water & sewer

INSURANCE
Do you have Insurance? Does it cover contents, interruption, or natural disasters?

- Standard insurance policy
- Not sure about insurance policy

- Specialized disaster insurance
- Business interruption & contents

Your business is never completely safe from hazards. Insurance helps to protect the time and money you invest in your business against the worst-case scenarios.

Your insurance agent can provide detailed answers to these questions specific to your business.

What is covered by my business insurance policies?
A standard insurance policy may not cover important situations, like damages caused by floods or losses from business interruption. Talk with your agent about different situations that concern you to see if you’re protected.

I rent my workspace. What is covered by my landlord’s insurance?
A landlord’s insurance policy may or may not cover losses incurred by tenants. Ask for a copy of the insurance policy and bring it to your own agent to review.

Does my standard policy cover business interruption?
You may lose business after a storm if power goes out, if roads are blocked, or if you need to close for repairs. Check with your agent whether lost business is covered or if you should purchase a rider to increase coverage.

What about liability and automobile insurance?
Liability and auto insurance are separate from business insurance and flood insurance. Talk to your agent about other policies you may need and what they cover. For example, auto insurance may partially cover your vehicle(s) for hazard events like severe storms.

What is a hurricane deductible?
Some policies include a separate hurricane deductible. Because hurricanes are rare, you pay less monthly. However, if a hurricane does hit, you will pay more before insurance kicks in. A storm must be hurricane-force when it hits Rhode Island for hurricane deductibles to apply. You may have other weather related deductibles (for example wind or hail). Check with your insurance agent to discuss what deductibles you may have and how they apply to other weather related events.

How do I make filing a claim easier?
Have insurance information and current inventory and equipment lists on-hand. Take photos or videos of your business site and inventory now, BEFORE an event occurs. Then, take photographs/video of any damage before clean-up or repairs. DO NOT make permanent repairs until your insurance company inspects the property. Save all receipts, including those from any temporary repairs.
FLOOD INSURANCE

FEMA offers subsidized flood insurance through the National Flood Insurance Program (NFIP). **You do not need to be in a flood zone, nor do you need to own your building, to purchase flood insurance.**

- One inch of water in a building can cause more than $25,000 in damage.
- Standard insurance typically does not cover flood damage.
- More than 1 in 5 flood claims come from outside high-risk flood zones (and that does not include building owners who were not insured, and therefore could not file claims).
- Flood insurance can pay whether or not there is a Disaster Declaration.
- Disaster assistance must be paid back with interest. The average flood insurance claim is nearly $30,000 and is not required to be repaid.

---

Can't I just get Disaster Assistance after a flood?
Disaster Assistance is given as a loan, it is not guaranteed, and it needs to be paid back with interest. It is not meant to make you whole again. Don't only rely on emergency assistance, get flood insurance!

---

CONSIDER KEY BUSINESS FEATURES

1. **BUILDING STRUCTURE**
   Hazards can damage foundations, walls, windows, roofs. Basements have high flood risk, even without flooding at ground level.

2. **ACCESS**
   Blocked roads may impact employees, customers, and the supply chain.

3. **DOCUMENTS & RECORDS**
   Documents, such as catering contracts or purchase orders, can be lost by direct damage or damage to IT systems.

4. **EMPLOYEES & VENDORS**
   Employees may be unable to access or leave the site during a hazard event. Reliance on third-party vendors may increase risk.

5. **CUSTOMERS**
   Customers may be unable to access or leave site during a hazard event. Extended & frequent disruption may turn off customers.

6. **INVENTORY & STORAGE**
   Paper products, dry goods and other inventory can be lost to flooding, or perishable food can be lost to spoilage due to power loss. Outdoor items like storage closets can be damaged or become dangerous debris if not secured.

7. **UTILITIES & EQUIPMENT**
   Damaged equipment and utilities located inside and outside the building can cause long-term disruption or temporary closure.

8. **INSURANCE**
   Your policies should cover the building, contents, business interruption, equipment, and outdoor items against disasters, including floods.

---

How do I get flood insurance?
Flood insurance policies are backed by the National Flood Insurance Program (NFIP). You can get a policy through most insurance agents.

Does flood insurance cover the building or its contents?
Contents and building coverage are separate; contents are not covered unless specifically included. Building coverage includes the structure and foundation, building utilities, and walk-in freezers. Contents coverage includes furniture, fixtures, equipment, and stock.

If my landlord has flood insurance, do I need it too?
The landlord may not provide any coverage or may have only building coverage. A renter can purchase its own flood insurance policy.

What is not covered by flood insurance?
Flood insurance policies do not cover everything or all water-related situations and damages. For example, outdoor assets such as landscaping, decks, or vehicles are not covered. Either is business interruption. Additionally, damage from burst pipes, backed-up municipal sewage, or poor site management is not covered.

How can I lower my premium?
Flood insurance cost is related to the level of flood risk. Risk reduction actions can lower premiums. Your community can also take steps to lower premiums.

My business is not in a flood zone. Do I need flood insurance?
A large percentage of flood damage happens outside of FEMA-designated floodplains. If your business is outside of a FEMA flood zone, flood insurance is generally inexpensive. Assess your risk and talk to your agent to make an informed decision.

### Local Government

Your local institutions, organizations, and utilities are often the best places to turn. Identify key staff and contact information:

- **Municipal Emergency Management Agency**
- **Fire Department (non-emergency)**
- **Building Official**
- **Chamber of Commerce**
- **Utility Company (ex. gas or electric)**

## GUIDE AT A GLANCE

- **Consider Key Business Features**
  - Page 3

- **Identify Vulnerabilities and Strengths**
  - Page 4

- **Select Risk Reduction Strategies**
  - Pages 5 - 6

- **Consider Insurance Options**
  - Pages 7 - 8

- **Useful Resources**
  - Page 9
This guide is targeted at businesses that own or manage brick and mortar, or off-site food preparation and service operations.

- This guide is meant to suggest actions to reduce risk to your business. However, the success of these strategies will be site dependent, and cannot be guaranteed.
- Each business is different; always consult with your local building official before starting a construction project.
- In most communities, if a project costs 50% or more of the value of the structure, “Substantial Improvement” requirements in the building code are triggered. This requires the property to be brought into compliance with the most up-to-date municipal floodplain management code.

### IMPORTANT DEFINITIONS

**Natural Hazards** = Extreme weather events that can cause damage. Examples include hurricanes, floods, blizzards, or severe wind.

**Business Features** = The many parts that make a business run. By looking at how a hazard affects each feature, you can take focused steps to reduce risk.

**Vulnerability** = Business features that make your business more likely to be impacted by a natural hazard.

**Risk** = The level of exposure that a business has to a certain hazard. Higher vulnerability and a frequent natural hazard create higher risk.

**Resilience** = The ability of a business to “bounce back” after a severe event. It is how much individuals, institutions, and businesses can survive, adapt, and grow no matter the weather events they experience.

### ADDITIONAL CONSIDERATIONS

**Historic Structures**

For historic properties, consult the following resources:

- “Keeping History Above Water” - created by the Rhode Island-based Newport Restoration Foundation to help protect historic resources from climate hazards. [www.historyabovewater.org](http://www.historyabovewater.org)
- FEMA “How-To” Guide #6 (FEMA 386-6) - provides comprehensive guidance to historic property owners. [www.fema.gov/media-library/assets/documents/4317](http://www.fema.gov/media-library/assets/documents/4317)
- Check with your local building official about your specific location. Also, coordinate with the State Historic Preservation Officer and the local Historic District Commission.

**Americans with Disabilities Act Compliance**

Before implementing a risk reduction project consider how it will affect access for people with physical disabilities. Structural changes may require that additional efforts be taken to maintain ADA compliance. Talk to your local building official about your plans before proceeding.

**Elevating Buildings and Pedestrian Access**

Elevating a building or installing floodwalls may lead to a loss of visibility or access, affecting your ability to attract customers. Identify protection options that avoid this outcome, and contact your local building official to clarify state and local requirements. Note that some business operations can occur in the lower section of an elevated building on a temporary basis.

**What if I Rent?**

Businesses that do not own their space can still perform many risk reduction actions, including buying flood insurance, planning and preparing, and performing some minor site alterations. At your next lease renewal, add a provision that rent does not need to be paid if the site is inaccessible or unusable during a hazard event. Discuss property protection with your landlord - they don’t want their building empty and their tenants damaged, either!

**What Should My Employees Know?**

Consider having all employees become certified by ServSafe. Visit [www.rifoodsafety.org](http://www.rifoodsafety.org) for more information on the certification program. Employees should also be aware of the proper protocols with any crisis management plans, food safety plans, and other emergency plans that are set in place. It is important that employees understand and are aware of the different requirements, such as storage temperatures and shelf life, of perishables to prevent spoiled food from being served.
